

ADT Always There®

**TOTAL  
WALTHER**

## COMPANY PROFILE

### **ADT and TOTAL WALTHER – the entire security spectrum**

**Security is more important than ever – the necessity and also demand for security has seldom been as great as today. In industry, public institutions but also in the private sector there has been an increase in the risk of burglary, theft or vandalism. The financial and non-material damages due to the loss of merchandise, data, plants, personal property but also cultural assets can be enormous. Competition is becoming harder and harder and companies must also face increasing cost pressure. Industry and public institutions are therefore informed that damage including breakdown and downtimes must be avoided as much as possible and/or reduced to a minimum.**

ADT and TOTAL WALTHER, prominent enterprises which operate in the global group of companies of Tyco International, stand for innovation, performance and reliability. The maxim of "integrated thinking and handling" has top priority in terms of security. For the protection of people, the environment and material assets, ADT and TOTAL WALTHER offer an array of solutions for added security.

#### **ADT – a Synonym for security world-wide**

With around 57,000 employees throughout the world, ADT is the largest enterprise in the sector of electronic security solutions. ADT's range of solutions stretches from complete solutions for comprehensive projects with integrated and harmonised security systems, to systems for theft protection in the retail trade. ADT is active in over 60 countries and develops and delivers for around eight million customers in the retail sector, industry and the private as well as the public sector, electronic security and surveillance systems. Numerous Fortune 500 enterprises from all the important sectors such as health, financial institutes, transportation and logistics, education but also leading retail chains, rely on ADT's experience spanning over a century.

The solutions of ADT include, in addition to theft protection systems for trade, intrusion detection, access control and video management systems. We focus on the individual requirements of each

customer, after which it is the task of the ADT experts to identify these and to develop suitable, tailor-made solutions.

### **Integrated solutions for the retail sector**

The products specifically aimed at the retail sector include the Electronic Article Surveillance (EAS) and Radio Frequency Identification (RFID). With these solutions, ADT contributes towards reducing inventory differences due to shop theft and also internal theft. Business intelligence concepts which integrate the various systems, make an intelligent use of the data collected and support retailers to increase profitability and optimise their processes.

Systems such as SmartEAS or Ultra•Max<sup>®</sup> combine state of the art technology with simplicity of use and an unobtrusive design and can be easily installed and integrated in every setting.

### **Video system solutions**

ADT also offers a comprehensive product range for all aspects of video monitoring, with either conventional or Internet protocol (IP)-based technology. With the aid of a network connection, IP-based systems can be operated and queried from several work stations – distance is no longer of any importance.

In the digital memory sector, with the Intellex<sup>®</sup> product range, ADT offers intelligent systems for the management of digital video material.

### **ADT Service-Center GmbH**

The ADT Service-Center GmbH rounds off the range of solutions offered by ADT. As one of the most modern alarm receiving centres in Europe, the Service Center notifies the relative security services or the police and the fire brigade of incoming alarms, takes over the remote surveillance of door monitoring systems, records closing and opening times and checks that the systems installed are in proper working order. In conjunction with technical and service concepts such as the ADT Gold Service, the service centre supports connected retail stores with the detection of shoplifters.

### **TOTAL WALTHER – Fire protection for a noticeable increase in security**

Founded in 1874, TOTAL WALTHER is one of the leading providers of integrated fire prevention solutions, as well as security and communications systems in Germany.

Solutions and products of TOTAL WALTHER are fine-tuned perfectly to the various fire hazards and fire scenarios. The company has a specific solution for each fire risk. These range from sophisticated sprinkler systems and water mist technology, CO<sub>2</sub>- and other gas extinguishing systems to special extinguishing systems. In an emergency, these combine the greatest protection for people and the

environment with the slightest adverse effect on assets and goods. Surroundings with particular security requirements, such as oil-rigs, power stations, oil refineries, transformers or storage areas for hazardous chemicals, can be efficiently protected with TOTAL WALTHER solutions.

In a highly modern extinguishing research centre in Cologne, TOTAL WALTHER intensively performs research in many areas, including that of explosion suppression and extinguishing system technology. Innovations such as the MicroDrop® and INERGEN® Technologies were developed here.

In addition to individual fire prevention systems, nursecall and communication solutions to support the nursing staff in hospitals, nursing homes or prisons, also feature among the achievements of TOTAL WALTHER. Numerous call functions and speaker possibilities optimise the work processes and increase security.

The combined local strengths and knowledge of the German market of ADT and TOTAL WALTHER and the global know-how of Tyco International, play their part in being able to guarantee customer-oriented system solutions as well as excellent services.
